

# How to remove filter to check for debris of GA711033 FILL VALVE for Wrightwood GTB20760

Published 09/13/2022 12:00 AM | Updated 09/29/2022 01:55 PM

## Step 1 - turn off shut off valve

## Step 2 - remove supply line from fill valve shank

**Step 3 - Using needle nose pliers or tweezers reach up inside the shaft of the fill valve and pull out the filter**

**Step 4 – Check filter for debris. If debris is found clean out filter and wipe out the inside of the shaft to remove debris.**

**Below is an example of filter and shaft with debris**

**Reinstall filter once cleaned**
